# Environment

AMK is located on 24 beautiful acres but downwind of pollution sources.  
We believe that growth should be balanced with reductions of harmful emissions.

Clean energy sources are needed because air pollution by coal burning powerplants and the surface mining processes used to obtain the fuel is harming public health. Surface mining releases toxins once locked inside rock to the groundwater and creates a permanent eyesore on the land. Waste rock has buried many miles of streams in a process known as "valley fill". Toxic emissions from coal burning include soot particles and nitrogen oxides that cause respiratory problems such as asthma and pneumonia, mercury that poisons our fish and makes them unsafe to eat, sulphur dioxide that causes haze, acid rain that harms our lakes and oceans and volumes of CO<sub>2</sub> that alter our climate !

Today there are many clean energy technologies available such as: solar, wind, geothermal and nuclear. These energy sources can provide energy savings too. Energy demand itself can be dramatically reduced by smart designs, installing programmable thermostats, updating lighting, HVAC equipment, minimizing outside air intake and inversion fans.

*The AMK facility is a small example.*

*We generate 90% of our electricity and collect soft rainwater onsite.*

*New efficient lighting uses 55% less electricity and geothermal heat pumps greatly reduced our heating and cooling costs.*

*30KW  
Solar Power Plant*

*Solar output is highest when electricity demand is highest during the summer !*

*Excess electricity is automatically distributed to nearby users.*

*Because the energy is produced locally where it is consumed the need for long distance transmission lines is reduced.*

## Green Thoughts

1. Restoring and driving a vintage car is better for the environment than manufacturing a new one because a huge amount of energy is saved and CO<sub>2</sub> emissions prevented.
2. Reusing is the best form of recycling, AMK reuses fastener cartons for shipping orders when possible.
3. Worldwide most steel products including fasteners are made from recycled material.
4. AMK fastener kit bags are #4 LDPE and can be recycled at your grocery store together with grocery bags.
